Education

ABV-Indian Institute of Information Technology and Management

Aug 2023 – 2027

B.Tech in Computer Science

Gwalior, MP

- **Relevant Coursework:** OOP, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Compiler Design

Work Experience

Software Developer (Summer Colloquium)

May 2026 – Present

ABV-IIITM Gwalior | SLDC Odisha Project

Gwalior, MP

- Architected a **centralized API abstraction layer** for the SLDC Odisha frontend, decoupling data-fetching logic from UI components and reducing redundant service calls across 10+ modules.
- Revamped the daily reporting module with **dynamic date-range selection**, eliminating hardcoded month/year constraints and cutting report generation friction for end users.
- Developed and integrated an **Hour-Ahead Load Forecasting model** into the `new_prediction_models` pipeline, extending real-time grid analytics with sub-hourly predictive capabilities.

Web Developer

Jan 2026 – Mar 2026

Sangillence (Startup)

🌐 sangillence.com/sobo

- Built a **full-stack platform** for the Sangillence Open Book Olympiad, handling end-to-end delivery for students across Class 3–10.
- Engineered **secure student registration** with **live photo capture** and on-site identity verification, ensuring tamper-proof participant validation.
- Shipped a **responsive, production-ready** product independently for a real client, from initial design to deployment.

Projects

Code-Buddy | *React.js, Node.js, Express.js, MongoDB, Socket.IO, Yjs, JWT*

🐙 [GitHub](#)

- Built a **real-time collaborative code editor** with live cursor tracking and conflict-free sync using **Yjs CRDT** and **Socket.IO**.
- Integrated **Monaco Editor** with multi-file tab navigation, syntax highlighting, and unsaved change indicators — mirroring a VS Code-like experience.
- Wired **JDoodle API** for in-browser code execution across **25+ languages** including Python, C++, Java, Go, and Rust.
- Implemented **JWT authentication** and **MongoDB-backed file persistence** with Ctrl+S sync propagated across all room participants.
- Built **real-time user presence panel** and **in-editor chat** to enable seamless collaboration without leaving the coding environment.

EdTech Platform | *React.js, Node.js, Express.js, MongoDB, Cloudinary, JWT, OAuth 2.0*

🐙 [GitHub](#)

- Developed a **full-stack educational platform** with course access, user management, and secure content delivery.
- Implemented **JWT + OAuth 2.0** (Google login) authentication and integrated **Cloudinary** for scalable media uploads.
- Hardened backend with **bcrypt hashing**, **HTTP-only cookies**, and strict **CORS** policies; built reusable UI with **React Hook Form**.

Technical Skills

Languages: C++, C, Python, JavaScript, TypeScript, SQL

Web Technologies: React.js, Redux, Tailwind CSS, Node.js, Express.js, Prisma, MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, Postman, Cloudinary, Canva

Coding Profiles: [LeetCode](#) | [Codeforces](#)

Positions of Responsibility

- **Executive, Uthaan Club:** Organized campus events and initiatives bridging academics and student welfare.
- **Design Lead, Inter-IIIT Sports Meet & Aurora:** Led visual design for two major college fests, producing posters and digital creatives using **Photoshop** and **Canva**.
